

SOUMYA RAIKWAR

Golang Backend | Machine Learning | Agentic AI | DevOps

somuraik@gmail.com | 9303402547 | Bhopal, India | linkedin.com/in/soumya-raikwar | github.com/SoumyaRaikwar

B.Tech IT student (2027) building Go and Python systems across backend engineering, machine learning, and agentic AI with active open-source contributions to Jaeger and OpenTelemetry.

SKILLS

Languages: Go, Python

AI / Agentic AI: LangChain, LangGraph, RAG, MCP, ChromaDB, vector embeddings, Skills, Agentic RAG

ML / Data: scikit-learn, Pandas, NumPy, Sentence Transformers, vector databases

Backend / DevOps: FastAPI, Gin, Docker, Kubernetes, Kubeflow Pipelines, AWS

Observability: OpenTelemetry, Jaeger, Prometheus, Elasticsearch

EXPERIENCE

Jaeger (CNCF Graduated Project) | Go, React/TypeScript | Active Contributor | 2026

- PR #7611: Implemented AWS SigV4 IAM authentication for Elasticsearch/OpenSearch storage by integrating AWS SDK v2 request signing and role-based credential handling into Jaeger's storage layer.
- PR #7628: Added custom HTTP header support for Elasticsearch/OpenSearch storage so teams can use bearer tokens, API keys, or proxy-based authentication in enterprise deployments.

OpenTelemetry Collector / Contrib (CNCF Graduated Project) | Go | Active Contributor | 2026

- PR #46096: Added a `disable_scope_info` option to the Prometheus Remote Write exporter and fixed scope-label translation for more accurate production metrics.
- PR #14713: Fixed metadata schema resolution in mdatagen so custom extensions are preserved during code generation instead of being silently dropped.

PROJECT

CodeSight AI - Agentic GitHub Codebase Intelligence | github

Python, FastAPI, LangGraph, RAG, MCP, ChromaDB, Next.js, Docker

- Built an AI assistant for GitHub repositories that helps users understand an unfamiliar codebase faster by reading repository files, answering questions, surfacing the most relevant code, and generating notes or diagrams.
- Designed the workflow so a user can ask plain-English questions about a project instead of manually searching through folders and files, making large repositories easier to explore even for non-experts.
- Tech used: FastAPI and LangGraph backend, sentence-transformer embeddings, ChromaDB vector search, MCP integration for external tools, Mermaid diagram generation, Next.js frontend, and Dockerized deployment.

EDUCATION

B.Tech, Information Technology - Jabalpur Engineering College | Expected April 2027

Class XII - Chitransh K.D. Memorial H.S. School | 2023 | 79%

Class X - Model H.S. School | 2021 | 91%

CERTIFICATIONS

- | | |
|--|-----------------------------------|
| • Intro to MCP - Anthropic Mar 2026 | verification link |
| • MCP: Advanced Topics - Anthropic Mar 2026 | verification link |
| • Machine Learning A-Z: AI, Python & R - Udemy | verification link |
